EDUCATION

Texas A&M University — College Station, TX

May 2026

Bachelor of Science, Computer Engineering

TECHNICAL SKILLS AND COURSEWORK

Programming:	Python, TypeScript, JavaScript, C++, C, Java, SQL
Frameworks:	React, React Native (Expo), Next.js, Node.js, Express, Tailwind CSS, Material UI, REST APIs
Tools & Cloud:	PostgreSQL, Firebase, Google Cloud, Git, Linux, Jira, CI/CD, Agile/Scrum, OpenCV, Docker
Relevant Courses:	Data Structures & Algorithms, Software Engineering, Databases (SQL), Human-Computer Interaction, Computational Photography, Computer Architecture

PROJECTS

BluStick (MACTrack 5) – Full-Stack & Mobile Developer

August 2025 – December 2025

- Built a **cross-platform mobile application** in **React Native (Expo)** and **TypeScript** featuring **Firebase Auth** login with **role-based admin access**, a **live interactive map**, and detection, event, and observation logging screens.
- Architected a **PostgreSQL database on Google Cloud SQL** with a **normalized six-table schema** and **tuned indexes**, backed by a **JWT-authenticated REST API**.
- Delivered a **production-ready device meeting all 10 project specifications**, including **24-hour battery life** and **~10% distance accuracy**.

Panda Express POS – Full-Stack Developer

Fall 2024

- Designed and developed a **full-stack point-of-sale platform** in **Next.js, React, Node.js, and PostgreSQL**, serving **four role-based interfaces** — cashier, self-serve kiosk, kitchen display, and manager dashboard.
- Implemented **real-time inventory tracking** and a **manager analytics dashboard** with sales trends, order history, and product-usage reporting to support **data-driven decisions**.
- Integrated **authentication, translation, and weather APIs** and secured routes with **role-based access control**.
- Led the team as Scrum Master** across **three Agile sprints**, coordinating task planning, standups, and delivery milestones.

Water Reflection Renderer – Software Developer

Spring 2026

- Built an **interactive Python and OpenCV rendering pipeline** producing **photorealistic water reflections** with **seven real-time adjustable parameters** and a **live preview**.
- Implemented **perspective warping, sine-ripple displacement, and seam-blended compositing**, and **optimized performance** with **dirty-flag caching**.

EXPERIENCE

Undergraduate Research Assistant – Texas A&M University

May 2025 – August 2025

- Trained deep-learning models** to classify agricultural seed images, **improving accuracy** by tuning model architecture and evaluating **classification metrics**.
- Designed and built the **user interface** for the **AI seed-classification research pipeline**, enabling researchers to run and review predictions.

ORGANIZATIONS AND LEADERSHIP EXPERIENCE

Tennis Coach – Youth Instructor

2022 – 2026

- Coached groups of 10–15 students** ages 11–18 on a single court, **adapting drills to individual skill levels** while keeping every player engaged.
- Tracked individual progress** and delivered **clear, constructive feedback**, building strong relationships with students and parents.

Aggie Coding Club – Member

2022 – Present

- Collaborated with peer developers** on coding projects and technical workshops to strengthen **software development skills**.
